

Full of Nature and Stars: Saji Astro Park

The Saji River Stone is known as one of the three famous Japanese stones and it is considered a special product of Saji village in Tottori Prefecture. This place is

Saji Astro Park
1071-1 Takayama
Saji Village, Tottori Prefecture,
Japan

famous for its natural environment and beautiful starlit sky at night. Saji Astro Park has been opened as a new attraction of this quiet town.

The special feature of this new facility is an astronomical telescope of 103 cm aperture and GOTO PLANETARIUM MODEL GEII. This place is also equipped with a lodging facility for overnight studies. As a result, the number of people visiting this facility is increasing everyday.

The dome whose diameter is 6.5 m can seat 40 people and is equipped with auxiliary projectors such as video and multi-slide projectors as well as the planetarium and together they create a colorful drama of the universe. The small sized, yet effective GOTO PLANETARIUM MODEL GEII plays an active role every day.
