

Come in to see the future

At the Pleiades National Planetarium Conference October 10-13 in St. Louis, enter the Gatwick B conference room to take part in a very special premiere.

For the first time in the Western Hemisphere, GOTO INC will unveil a unique planetarium projector called ORPHEUS™.

And best of all, the all-new ORPHEUS is the central part of a GOTO HYBRID Planetarium™ system that has a lower cost of ownership than many full-dome-only systems.

At the Pleiades conference, be sure to enter Gatwick B in the Renaissance St. Louis Airport Hotel for your personal, hands-on “test drive” of this amazing new system. We’re just behind that door.

Smaller than any other projector with comparable features, yet more powerful.

One of the quietest opto-mechanical projectors in the industry.

A specialized, embedded video projector inside the opto-mechanical projector.

Unique, new types of individual control of stars and constellation outlines.

Tiny twinkling stars, new sunsets, planets, and Milky Way create the most realistic sky ever.

The industry's best HYBRID control console puts it all at your fingertips.
